

SYNC Agent Module User Manual

Agent Operations and System Usage Guide

This manual explains the Agent Module of the SYNC System: what it is for, what every screen shows, what each button does, and how to carry out each task step by step. It is divided by role, so that what an Agent does and what an Administrator does are never confused with one another. It covers both the Web Application and the Mobile Application.

Document Title	SYNC Agent Module User Manual
Subtitle	Agent Operations and System Usage Guide
Version	1.0
Document Date	8 August 2026
Prepared By	SYNC Documentation Team
Organization	SYNC
Intended Audience	Agents, and Administrators who manage Agents
Applies To	Web Application and Mobile Application
How it is organised	Part Two is for Agents. Part Three is for Administrators.

Each chapter states the role it applies to directly under its heading. If a screen described here does not appear in your menu, your role does not have it — contact your administrator to confirm your account permissions.

PART ONE

About the Agent Module

Read this part whatever your role. It explains what the module is for, sets out exactly which tasks belong to Agents and which belong to Administrators, and shows how to sign in and find your way around.

1. Introduction

Applies to: BOTH roles

1.1 What the Agent Module Is

The Agent Module is the part of the SYNC System that deals with Agents and the customers they bring in. It covers the whole of that relationship: submitting a new customer, following the installation, calculating what the Agent has earned, and recording what has been paid out to them.

The module is used by two different kinds of people, and this is the single most important thing to understand about it. Agents use it to submit referrals and to watch their own earnings. Administrators use it to set up Agent accounts and teams, and to record payouts. The two see different menus and different controls, even on screens that share a name.

1.2 The Two Roles

Role	Who they are	What the module gives them
Agent	A person who introduces new customers to the business.	A private view of their own referrals and their own earnings. They can submit applications and review records, but they cannot change operational data or record money movements.
Administrator	Office and management staff responsible for the Agent programme.	A management view across all Agents: creating Agent accounts and teams, and recording commission, incentive and bonus transactions.

IF YOU ARE UNSURE WHICH YOU ARE

Sign in and look at your menu. An Agent sees Dashboard, Job Order, Work Order and History. An Administrator sees a much longer menu that includes an Agent group containing Pay Out/In, Team Agents, Agent Management and Agent Payout. On a phone, your role is printed on a badge at the top of the Menu screen.

1.3 Purpose of the Module

- **Bring in customers.** Agents record new applications, which are credited to them automatically.
- **Track installations.** Both roles can follow a referral from submission through to completion.
- **Calculate earnings.** Commission, quota incentives, bonuses and milestone rewards are held against each Agent.
- **Record payments.** Administrators record what has been paid, and Agents can see it.
- **Organise the programme.** Administrators create Agent accounts and group them into teams.

1.4 How the Module Fits Into the Overall Workflow

1. An Administrator creates the Agent account, and assigns it to a team where teams are used.
2. The Agent submits a customer application. The referral is credited to that Agent.
3. The office reviews the application and raises a job order for the installation.
4. A coordinator assigns a technician and schedules the visit.

5. The technician visits the address and records the outcome on site: Done, Reschedule or Failed.
6. Completed referrals count towards the Agent's commission, quota incentives and onboarding milestones.
7. An Administrator records the payout. The Agent sees it in their History.

Steps 3, 4 and 5 sit outside the Agent Module and are covered by the operational procedures for those teams.

2. Roles and Responsibilities

Applies to: BOTH roles

This chapter is the definitive answer to "who does what". Everything later in the manual is consistent with the tables below. If you are ever unsure whether a task is yours, look here first.

2.1 Task Responsibility Matrix

Task	Agent	Administrator
Submit a customer application	Yes	Yes
View their own referrals	Yes	Yes — for all Agents
View another Agent's referrals	No	Yes
Edit or update a job order	No	Yes
Approve or reject a job order	No	Yes
Assign or reassign a technician	No	Yes
See installation photographs and documents	No	Yes
Raise a work order	No	Yes
View their own balances	Yes	Yes — for all Agents
Claim an onboarding milestone reward	Yes	Yes — on an Agent's behalf
Record a commission payout	No	Yes
Add or pay out incentives	No	Yes
Add or pay out a bonus	No	Yes
Create or edit an Agent account	No	Yes
Create, rename or delete an Agent team	No	Yes
Export records they can see	Yes	Yes

2.2 What Each Role Sees in the Menu

Menu entry	Agent	Administrator
Dashboard	Their own Agent Dashboard	The management dashboard
Job Order	Their own active referrals only	All job orders
Work Order	Work assigned to them only	All work orders
History	Their own earnings records	—
Pay Out/In	—	Commission, incentive and bonus records for all Agents
Team Agents	—	The list of Agent teams
Agent Management	—	Agent user accounts
Agent Payout	—	Payouts by Agent, with balances

Menu entry	Agent	Administrator
Affiliates	—	Affiliate groups, on the Mobile Application

THE SAME SCREEN, TWO NAMES

The screen an Agent knows as History is the same screen an Administrator opens as Pay Out/In. An Agent sees only their own records and cannot record anything. An Administrator sees every Agent and can record transactions. This is the most common source of confusion, so the two views are documented separately: Chapter 10 for Agents, Chapter 19 for Administrators.

2.3 Boundaries That Cannot Be Crossed

- **An Agent can never see another Agent's records.** The system restricts every list and every total to the signed-in Agent, regardless of what is typed into a search or filter.
- **An Agent can never change operational data.** Job orders and work orders are read-only for Agents in both applications.
- **An Agent can never award themselves money.** Commission, incentive and bonus transactions are recorded by Administrators only.
- **A milestone can never be claimed twice.** The system re-checks the Agent's completed referrals on every claim and refuses a repeat.
- **Records stay within an organisation.** Administrators manage the Agents and teams belonging to their own organisation.

3. Signing In and Getting Around

Applies to: BOTH roles

3.1 Accessing the System

On a computer, open the SYNC System address supplied by your administrator in a web browser. On a phone, open the SYNC Mobile Application. Both open on the sign-in screen.

3.2 Credentials Required

Field	What to enter
Account No./Username/Email	Any one of the three identifiers issued with your account. All three are accepted in the same field.
Password	The password issued to you, or the one you last set yourself.

SECURE LOGIN

PURPOSE

Verifies your credentials and opens the system with the menu your role is permitted to see.

HOW TO USE

1. Open the Web Application in a browser, or open the Mobile Application.
2. Enter your account number, username or email address in the first field.
3. Enter your password in the second field. Use the eye control at the end of the field to check what you typed.
4. Select SECURE LOGIN.
5. Wait while the button reads LOGGING IN. Do not select it a second time.

EXPECTED RESULT

An Agent lands on the Agent Dashboard with their balances and referral figures loaded. An Administrator lands on the management dashboard. In both cases the menu shows only what the role permits.

Forgot Password?

PURPOSE

Starts a password reset when you cannot sign in.

HOW TO USE

1. On the sign-in screen, select Forgot Password?.
2. Enter your email address or account number.
3. Submit the request and follow the instructions sent to you.
4. Select Back to Login to return to the sign-in screen.

EXPECTED RESULT

A confirmation message is displayed and reset instructions are sent to the address held on your account. On

the Mobile Application a short waiting period applies before a further request can be made.

3.3 Moving Between Screens

Where you are	How to move between screens
Web Application	Use the navigation menu down the left of the window. Select an entry to open that screen. On a narrow window, open the menu using the menu control in the top bar. Administrator entries for this module are grouped together under Agent.
Mobile Application	Use the navigation bar across the bottom of the screen. Select Menu for the additional items. For Administrators, the Agent group in the Menu holds the management screens.

3.4 Logging Out

Logout

PURPOSE

Ends your session and returns to the sign-in screen, so that nobody else can use your account.

HOW TO USE — WEB APPLICATION

1. Locate Logout at the foot of the navigation menu on the left.
2. Select Logout.

HOW TO USE — MOBILE APPLICATION

1. Select Menu in the bottom navigation bar.
2. Select Sign out.
3. Select Confirm in the message that appears, or Cancel to stay signed in.

EXPECTED RESULT

Your session ends and the sign-in screen is displayed. You must sign in again to continue.

BEST PRACTICE

Always log out on a shared or public computer. Closing the browser window alone does not guarantee that your session has ended.

PART TWO

The Agent Role

Everything an Agent can do, and nothing an Agent cannot. If you are an Agent, this part is your manual — you can work from it without reading Part Three at all. Where a task belongs to somebody else, it says so and tells you who to contact.

4. Agent Dashboard

Applies to: AGENT role

The Agent Dashboard is your home screen. It answers three questions at a glance: how much you have earned, how your referrals are progressing, and how close you are to your next milestone.

4.1 Screen Layout

Section	What it displays	Why it matters
Identity card	Your initials, your name and your Agent ID.	Confirms you are working in your own account before you submit anything.
Balance figures	Four figures: Incentives, Commission, Bonus and Achievement.	Shows how your earnings are made up, not just the total.
Referral figures	Four counts: In Progress, Done, Failed and Reschedule.	Shows the state of everything you have referred.
Achievement panel	A progress gauge towards 30 onboarded referrals, and the reward control when it is unlocked.	Tracks your milestone and lets you claim the reward.
Total Balance	Your Commission, Incentives and Bonus figures added together.	The amount recognised on your account.
Cashout History	Your five most recent payout records, each with a reference number, date and amount.	Confirms that payouts have been recorded against your account.

4.2 Understanding Your Balance Figures

Figure	What it represents	How it increases
Commission	Your main spendable balance.	Credited by an Administrator for completed referrals, and credited automatically when you claim an onboarding milestone reward.
Incentives	Rewards earned for reaching your referral quota.	Added automatically each time your completed referrals reach a full quota batch.
Bonus	Discretionary amounts granted by the office.	Added by an Administrator when a bonus is awarded to you.
Achievement	A lifetime record of milestone rewards you have claimed.	Increases by the reward amount each time you claim a milestone. It is a record only; the money itself is added to your Commission figure.

WHY ACHIEVEMENT IS NOT ADDED TO TOTAL BALANCE

When you claim a milestone, the reward is paid into your Commission figure so that it can be paid out to you. The Achievement figure records how much you have earned from milestones over time. Adding both together would count the same reward twice, so Total Balance is the sum of Commission, Incentives and Bonus only.

4.3 Understanding Your Referral Figures

Figure	Meaning
--------	---------

Figure	Meaning
In Progress	Referrals that have been raised for installation but not yet visited.
Done	Referrals successfully installed. These count towards commission and milestones.
Failed	Referrals that did not result in an installation.
Reschedule	Referrals where a further visit is required.

4.4 Dashboard Controls

Refresh

PURPOSE

Reloads your balances, referral figures, milestone status and cashout history from the system.

HOW TO USE

1. Open the Agent Dashboard.
2. Select Refresh at the top right of the screen.
3. Wait for the control to stop spinning.

EXPECTED RESULT

Every figure on the dashboard is updated. Use it after submitting an application, or when you expect an Administrator to have recorded a payout.

Show Referrals / Show Balances

PURPOSE

Turns the card over. One side shows your four balance figures; the other shows your four referral counts and your email address. The same control switches back.

HOW TO USE

1. Locate the circular control at the top right of the card.
2. Select it to show your referral figures.
3. Select it again to return to your balance figures.

EXPECTED RESULT

The four figures on the card are replaced by the other set. Nothing is changed or saved; this control only changes what is displayed.

Get Reward

PURPOSE

Claims the reward for an onboarding milestone you have reached. The control is only displayed when you have an unclaimed milestone, and it shows the reward amount on its face.

HOW TO USE

1. Check the achievement gauge. The control appears only when the milestone is complete.
2. Confirm that the number of Done referrals is correct on the referral side of the card.
3. Select Get Reward.
4. Wait for the confirmation message. Do not select the control a second time while it is working.

EXPECTED RESULT

A message confirms that the reward has been added to your balance. Your Commission figure increases by the reward amount, your Achievement figure increases by the same amount as a record, and the gauge resets towards your next milestone. A milestone can only ever be claimed once.

IF THE REWARD IS REFUSED

The system re-checks your completed referrals when you claim. If the message says the milestone has not been reached, your Done count has not yet met the target — the gauge may be showing figures loaded earlier. Select Refresh and check again. If the message says the milestone has already been claimed, the reward is already on your account.

Application Form

PURPOSE

Opens the form used to submit a new customer application. This is the main way you add a referral.

HOW TO USE

1. Locate the Total Balance panel on the dashboard.
2. Select Application Form.
3. Complete the form as described in Chapter 6.

EXPECTED RESULT

The Application Form opens with your name already recorded as the referrer. When you save or cancel, you are returned to the dashboard.

4.5 Cashout History

The Cashout History list at the foot of the dashboard shows your five most recent payout records. Each entry shows the reference number, the date it was recorded and the amount, marked POSTED. If no payouts have been recorded, the list reads "No cashouts found".

For the complete list, and for incentive and bonus records, open the History screen described in Chapter 10.

5. Agent Navigation

Applies to: AGENT role

These are the screens available to an Agent account. Any screen not listed here is not part of the Agent role.

5.1 Dashboard

PURPOSE

Your home screen: earnings, referral progress, milestone status and recent payouts.

HOW TO ACCESS

1. Select Dashboard in the navigation menu.

AVAILABLE ACTIONS

- Refresh your figures.
- Switch the card between balances and referral counts.
- Claim a milestone reward when one is available.
- Open the Application Form.
- Review your five most recent payouts.

5.2 Job Order

PURPOSE

Lists the referrals you have submitted that are currently being handled in the field.

HOW TO ACCESS

1. Select Job Order in the navigation menu.

AVAILABLE ACTIONS

- Search and filter your referrals.
- Switch between the table view and the card view.
- Choose which columns are displayed.
- Open a referral to review its customer and visit information.
- Export the list you are viewing.

Job orders are read-only for Agents. See Chapter 7.

5.3 Work Order

PURPOSE

Lists work orders that have been assigned to you by name or email address.

HOW TO ACCESS

1. Select Work Order in the navigation menu.

AVAILABLE ACTIONS

- Search the work orders assigned to you.

- Filter by status.
- Switch between the table view and the card view.
- Open a work order to review its details.
- Export the list you are viewing.

Agents cannot raise a new work order. The control used to add one is not shown to your role.

5.4 History

PURPOSE

The complete record of what you have earned and what has been paid out, across three tabs.

HOW TO ACCESS

1. Select History in the navigation menu.

AVAILABLE ACTIONS

- Switch between Commission History, Incentives History and Bonus History.
- Search within the records displayed.
- Narrow the records to a date range.
- Choose which columns are displayed.
- Export the records to a PDF file.

5.5 Application Form

PURPOSE

The form used to submit a new customer application under your name.

HOW TO ACCESS

1. Open the Dashboard.
2. Select Application Form in the Total Balance panel.

5.6 Menu (Mobile Application only)

PURPOSE

Holds your profile summary, your notifications, application information and the sign-out control.

HOW TO ACCESS

1. Select Menu in the bottom navigation bar.

AVAILABLE ACTIONS

- **Notifications.** Open the list of messages sent to you.
- **About App.** View information about the application.
- **Release Notes.** View what has changed in the current version.
- **Sign out.** End your session.

6. Submitting Customer Applications

Applies to: AGENT role

SCOPE

The Agent role does not include a customer directory. You cannot browse or search all customers of the business. You work with customer information in two places only: the Application Form, where you enter a new customer's details, and the Job Order screen, where you review the details of a customer you referred.

6.1 The Application Form

The Application Form is divided into four parts: the customer's details, the installation address, the plan, and the supporting documents. Fields marked with an asterisk are required.

Customer Details

Field	Required	What to enter
Email	Yes	The customer's email address. Used to contact them about the installation.
First Name	Yes	The customer's given name.
Middle Initial	No	A single letter, if the customer uses one.
Last Name	Yes	The customer's surname.
Mobile	Yes	An 11-digit mobile number. Digits only.
Secondary Mobile	No	An alternative 11-digit contact number.

Installation Address

Field	Required	What to enter
Region	Yes	Select the region from the list.
City/Municipality	Yes	Select the city or municipality. The list depends on the region chosen.
Barangay	Yes	Select the barangay. The list depends on the city chosen.
Installation Address	Yes	The full street address where the service is to be installed.
Landmark	No	A nearby landmark to help the technician find the address.
Referred By	Read-only	Your own name, filled in automatically. It cannot be edited — referrals you submit are always credited to your account.

Plan Selection

Field	Required	What to enter
Plan	Yes	Select the plan the customer has agreed to. Type to narrow the list.

Upload Documents

Images may be JPG or PNG files of up to 10 MB each.

Document	Required	Notes
Government Valid ID (Primary)	Yes	A clear photograph of the customer's primary identification.
Government Valid ID (Secondary)	No	A second form of identification, if available.
Proof of Billing	No	A recent bill showing the customer's address.
House Front Picture	No	A photograph of the front of the property, to help the technician locate it.

6.2 Application Form Controls

Save

PURPOSE

Submits the completed application and credits the referral to your account.

HOW TO USE

1. Complete every field marked with an asterisk.
2. Attach the primary government identification. Attach any other documents you have.
3. Check the customer's name, mobile number and installation address once more.
4. Select Save.
5. Wait while the control reads Saving. Do not select it again.

EXPECTED RESULT

A message confirms that the application was submitted successfully, the form is cleared and you are returned to the Dashboard. The referral will appear on your Job Order screen once the office has raised a job order for it.

IF A REQUIRED FIELD IS MISSING

A message asks you to complete all required fields marked with an asterisk, and the fields concerned are highlighted. Nothing is submitted. Complete them and select Save again.

IF THE DOCUMENTS FAIL TO UPLOAD

The application itself is still submitted, and a message tells you the documents could not be attached. Inform the office so the documents can be added to the application record.

Cancel

PURPOSE

Closes the Application Form without submitting anything.

HOW TO USE

1. Select Cancel at the top of the form.

EXPECTED RESULT

The form closes and you return to the Dashboard. Anything you had typed is discarded.

7. Job Orders — Agent View

Applies to: AGENT role

A job order is the installation record raised for a customer you referred. This screen lets you follow that installation through to completion.

7.1 What You See

- **Your referrals only.** The list contains only job orders credited to your account.
- **Active work only.** Only referrals still being handled in the field are listed — those In Progress and those awaiting a further visit. Completed and failed referrals are counted on your Dashboard.

WHY A REFERRAL DISAPPEARS FROM THE LIST

When a technician marks the installation Done, the referral leaves your Job Order list. This is normal and does not mean anything is lost — the referral is counted under Done on your Dashboard and becomes eligible for commission.

7.2 Columns Available to Agents

Column	What it shows
Timestamp	When the job order was created.
Referred By	The Agent credited with the referral — your own name.
Full Name of Client	The customer's name.
Contact Number	The customer's mobile number.
Email Address	The customer's email address.
Full Address of Client	The installation address.
Installation Fee	The fee recorded for the installation.
Billing Status	The billing state of the customer's account.
Billing Day	The day of the month the customer is billed.
Date Installed	The date the installation was completed, once it has been.
Onsite Status	The current state of the visit. See Chapter 9.

7.3 Opening a Job Order

View Job Order Details

PURPOSE

Opens the full record of a single referral so you can review its progress.

HOW TO USE

1. Open the Job Order screen.
2. Locate the referral, using search or the filters if the list is long.

3. Select the row in the table view, or the card in the card view.

EXPECTED RESULT

The details panel opens showing the customer information, the address, the visit information and the current status.

What Is Shown, and What Is Not

Visible to Agents	Hidden from Agents
Customer name, contact number and email address	Equipment serial numbers and router model
Full installation address and coordinates	Line, port and network assignment details
Installation fee, billing status and billing day	Account username, address and connection settings
Visit information, including who attended	All uploaded photographs and signed documents
Onsite status, remarks and date installed	Identification documents and proof of billing

Installation and identity documents are withheld from Agents to protect customer information. An Administrator can see them. If you need something from a document you submitted, ask the office.

7.4 Available Actions

Action	Agent	Who performs it instead
View a job order	Yes	—
Search and filter the list	Yes	—
Change the columns displayed	Yes	—
Export the list	Yes	—
Edit job order information	No	An Administrator, or the technician on site.
Approve or reject a job order	No	An Administrator.
Assign or change the technician	No	A coordinator.
Change the onsite status	No	The technician, while on site.
Reschedule a visit	No	A coordinator, at the technician's request.

REPORTING A PROBLEM WITH A REFERRAL

There is no report control on the Job Order screen. If a customer's details are wrong, if the address needs correcting, or if a visit has not taken place, contact your coordinator or the office directly and quote the customer's name and the date the job order was raised.

7.5 Job Order Screen Controls

Control	Function
All Job Orders	Clears the current filter selection and returns to the full list of your referrals.
Back to Filters	On a narrow screen, returns from the list to the filter panel.
Table	Displays the referrals as rows in a table. Best on a computer.
Card	Displays each referral as a card. Best on a phone or narrow window.

Control	Function
Column Visibility	Opens the list of columns so you can show or hide each one.
Export to CSV	Saves the referrals currently listed to a spreadsheet file.
First Page / Last Page	Jumps to the beginning or the end of a long list.

8. Work Orders — Agent View

Applies to: AGENT role

The Work Order screen lists work orders that have been assigned to you personally, matched on your name or your email address. Work orders assigned to anybody else are not shown.

8.1 Reviewing Assigned Work

PURPOSE

Lets you see what has been allocated to you and what state it is in.

HOW TO USE

1. Select Work Order in the navigation menu.
2. Use the search field, or filter by status, to find the entry you need.
3. Select the row or card to open the work order and review its details.

EXPECTED RESULT

The work order opens for review. The entry shows who it is assigned to, and its current status.

8.2 What You Can and Cannot Do

Action	Agent	Who performs it instead
View work assigned to you	Yes	—
Search, filter and export	Yes	—
Raise a new work order	No	An Administrator. The add control is not shown to Agents.
Edit a work order	No	An Administrator.
Assign work to somebody else	No	A coordinator.

8.3 What You Can See About Assignment

Information	Where it appears	What it tells you
Assigned technician	Job order details, where recorded.	Who is responsible for carrying out the installation.
Visit information	Job order details.	Who attended the address, and who accompanied them.
Onsite status	Job Order list and details.	Whether the visit is still pending, needs repeating, or is finished.
Onsite remarks	Job order details.	What the technician recorded about the visit.
Date installed	Job Order list and details.	When the installation was completed.

8.4 Requesting a Change

1. Open the job order or work order concerned and note the customer's name and the date.
2. Contact your coordinator or the office through your normal channel.

3. State clearly what needs to change: a correction to the address, a different visit date, or a repeat visit.
4. Check the record again afterwards to confirm the change has been made.

9. Job Order Statuses

Applies to: BOTH roles

The onsite status tells you where a referral has reached. It is set by the technician on site and by the office. Agents cannot change it; Administrators can.

9.1 Status Reference

Status	Meaning	What the Agent should do
In Progress	The job order has been raised and the visit has not yet been completed.	No action. Check back periodically. Make sure the customer is expecting the visit and is contactable.
Reschedule	The technician attended or attempted the visit and a further visit is required.	Contact the customer to confirm they are available for the next visit, and inform your coordinator of anything that would prevent it.
Done	The installation was completed successfully.	No action. The referral leaves the Agent's Job Order list, is counted under Done on the Dashboard, and becomes eligible for commission and milestone credit.
Failed	The visit did not result in an installation.	No action is possible on the record. If the referral can still proceed, raise it with the office.

9.2 Where Each Status Appears

Status	Agent's Job Order list	Agent Dashboard count
In Progress	Listed	In Progress
Reschedule	Listed	Reschedule
Done	Not listed	Done
Failed	Not listed	Failed

An Administrator sees job orders at every status, not only the active ones.

9.3 Billing Status

Separately from the onsite status, a job order carries a billing status describing the state of the customer's account once the service is live. It is shown as a column on the Job Order list and in the job order details. It is maintained by the billing team and requires no action from an Agent.

10. Your Earnings and History

Applies to: AGENT role

SCOPE

This chapter describes the History screen as an Agent sees it: your own records, review only. The same screen is used by Administrators under the name Pay Out/In, where transactions can be recorded — that is Chapter 19.

10.1 The History Screen

Tab	What it lists
Commission History	Payouts recorded against your account, including milestone rewards.
Incentives History	Quota incentives awarded to you automatically, one line per qualifying referral.
Bonus History	Bonus amounts added or paid out by the office.

10.2 Commission History Columns

Column	What it shows
ID	The record number.
Ref Number	The reference number of the payout. Quote this when querying a payment.
Total Amount	The amount recorded.
Job Orders	The customers the payout relates to, where recorded.
Processed By	The Administrator who recorded the payout.

10.3 Incentives History Columns

Column	What it shows
ID	The record number.
Agent	The Agent credited — your own name.
Job Order	The completed referral that counted towards the quota.
Batch	Which quota batch this referral belonged to. Batches are numbered from one upwards.
Quota Reached	The number of completed referrals required for one incentive batch.
Incentive Value	The amount awarded for completing that batch.
Processed At	When the incentive was awarded.

Incentives are awarded automatically — no Administrator action is needed. Each time your completed referrals reach a full quota, the incentive value is added to your Incentives figure and one line is recorded here for each referral in that batch. Referrals left over after a full batch carry forward towards the next one, so nothing is lost.

10.4 Bonus History Columns

Column	What it shows
ID	The record number.
Ref Number	The reference number of the bonus record.
Type	Whether the amount was added to your bonus figure or paid out from it.
Total Amount	The amount concerned.
Processed By	The Administrator who recorded it.

10.5 Reviewing Your Records

Open a Record

PURPOSE

Shows the full detail of a single earnings or payout record.

HOW TO USE

1. Open the History screen and select the tab you need.
2. Locate the record, using the search field or the date range if the list is long.
3. Select the row.

EXPECTED RESULT

The record opens for review, showing all recorded values including the remarks entered by the Administrator.

Refresh Records

PURPOSE

Reloads the earnings records from the system so that newly recorded payouts appear.

HOW TO USE

1. Open the History screen.
2. Select Refresh Records in the toolbar.
3. Wait for the control to stop spinning.

EXPECTED RESULT

The list is reloaded. Any payout recorded since you opened the screen now appears.

AGENTS DO NOT RECORD PAYOUTS

Creating a payout record is an Administrator task, covered in Chapter 19. Your role on this screen is to review what has been recorded and to raise anything that looks wrong with the office, quoting the reference number.

11. Reporting and Exports

Applies to: AGENT role

SCOPE

The Agent role does not include a report builder, and there is no form on which an Agent submits a periodic report. Agent reporting means producing a PDF or spreadsheet of the records you are entitled to see. Nothing is submitted to the office when you do this, so these actions can be repeated as often as you need.

11.1 Producing an Earnings Report

Export to PDF

PURPOSE

Produces a PDF of the earnings records currently displayed on the History screen.

HOW TO USE

1. Open the History screen.
2. Select the tab you want to report on: Commission History, Incentives History or Bonus History.
3. Set the reporting period using the From and To date fields.
4. Use Column Visibility to include only the columns you want to appear.
5. Check that the records shown are the ones you expect.
6. Select Export to PDF.

EXPECTED RESULT

A PDF is produced containing the records currently displayed, using the columns you selected. Nothing on your account is changed.

11.2 Producing a Referral Report

Export to CSV

PURPOSE

Produces a spreadsheet file of the referrals currently listed on the Job Order or Work Order screen.

HOW TO USE

1. Open the Job Order screen, or the Work Order screen.
2. Apply any search or filter needed so that only the records you want are listed.
3. Select Export to CSV.

EXPECTED RESULT

A spreadsheet file is produced containing the listed records. It can be opened in any spreadsheet application.

11.3 Selecting a Reporting Period

Field	What it does
-------	--------------

Field	What it does
From	Excludes records dated before the date chosen.
To	Excludes records dated after the date chosen.
Clear	Removes both dates and restores the full list. Appears only when a date is set.

Leaving both dates empty reports on all records available to you.

12. Search and Filtering

Applies to: BOTH roles

Every list screen offers the same tools for narrowing what is displayed. They only change what you see — no record is altered by searching or filtering. The controls behave identically for both roles; only the records they search across differ.

12.1 Search

Control	What it does	When to use it
Search field	Narrows the list to records containing what you type. Results update as you type; there is no separate search button to select.	When you know part of a customer name, a reference number or an address.
Clearing the search	Delete the text in the field to restore the full list.	When you have finished with a search and want everything back.

SEARCH NEVER WIDENS ACCESS

Searching applies only to the records your role already has. An Agent searching for another Agent's customer will find nothing, because those records are not in their list to begin with.

12.2 Filters

The Job Order screen offers a filter panel with a field for each part of a referral. Enter a value, or tick the entries you want, and the list narrows to matching records.

Filter	Type	Use it to find
First Name / Last Name	Type a value	A referral by the customer's name.
Contact Number	Type a value	A referral by the customer's mobile number.
Applicant Email Address	Type a value	A referral by the customer's email address.
Referred by	Type a value	Referrals credited to a particular Agent. Most useful to Administrators.
Region / City / Barangay	Tick from a list	All referrals in a particular area.
Choose Plan	Tick from a list	All referrals on a particular plan.
Status	Tick from a list	Referrals at a particular stage.
Billing Day	Type a value	Referrals billed on a given day of the month.
Remarks	Type a value	Referrals with particular notes recorded against them.

12.3 Date Range

Control	What it does	When to use it
From	Hides records dated before the date chosen.	To report on a period starting on a known date.

Control	What it does	When to use it
To	Hides records dated after the date chosen.	To report on a period ending on a known date.
Clear	Removes both dates. Appears only when a date has been set.	To return to the full list.

12.4 Resetting

Control	What it does
All Job Orders	Clears the filter selection on the Job Order screen.
All Agents	On the Agent Payout screen, returns from one Agent to the whole list.
Clear	Removes the date range.
Emptying the search field	Removes the search restriction on any list.

IF A LIST LOOKS EMPTY

An empty list almost always means a filter, a search term or a date range is still applied from earlier. Clear all three before concluding that a record is missing.

12.5 Sorting, Pagination and Columns

Control	What it does
Column heading	Select to sort by that column; select again to reverse the order.
Rows per page	Sets how many records appear on one page.
Next / Previous	Moves forward or back one page.
First Page / Last Page	Jumps to the beginning or the end of the list.
Column Visibility	Chooses which columns appear, and therefore which appear in an export.

Your column selection is remembered for the next time you open the screen.

13. Notifications

Applies to: BOTH roles

Notifications tell you when something relevant to your work has happened, such as a referral being completed.

13.1 Viewing Notifications — Web Application

Notifications

PURPOSE

Opens the list of recent messages. A badge on the control shows how many are unread.

HOW TO USE

1. Locate the bell control in the bar across the top of the window.
2. Select it to open the notification panel.
3. Read the list. Each entry shows its type, its message and when it arrived.
4. Select the bell again, or select elsewhere, to close the panel.

EXPECTED RESULT

The panel opens, headed Recent Notifications with the number held. Opening the panel clears the unread badge.

Clear All

PURPOSE

Empties the notification panel of everything currently listed.

HOW TO USE

1. Open the notification panel.
2. Select Clear All at the top of the panel.

EXPECTED RESULT

The listed notifications are removed from the panel. Only newer notifications will appear from that point on.

NOTE

Clear All removes the messages from your view only. It does not change any record, and it cannot be undone — read anything important before clearing.

13.2 Viewing Notifications — Mobile Application

1. Select Menu in the bottom navigation bar.
2. Select Notifications.
3. Read the list.
4. Close the panel to return to the Menu.

13.3 Notification Types

Type	What it means	What to do
Job order completed	An installation has been marked as finished.	An Agent should check their Dashboard: the Done count and balances may have changed.
General notice	An operational message from the system or the office.	Read it and act on it if it concerns one of your referrals.

Notifications are informational. There is no reply or approval action to take within a notification.

14. Mobile Application — Agent

Applies to: AGENT role

The Mobile Application provides the same Agent functions as the Web Application, arranged for a phone. Everything recorded on the phone is immediately available on the computer, and the reverse.

14.1 Signing In

1. Open the SYNC Mobile Application.
2. Enter your account number, username or email address.
3. Enter your password.
4. Select SECURE LOGIN and wait while it reads LOGGING IN.

Forgot Password? starts a reset from the phone. APPLY NOW on the sign-in screen is for members of the public applying for service and is not part of Agent sign-in.

14.2 Navigation

Item	Opens
Dashboard	Your earnings, referral figures and milestone progress.
Job Order	The referrals you have submitted that are still in the field.
Work Order	The work orders assigned to you.
History	Your commission, incentive and bonus records.
Menu	Your profile, notifications, application information and sign out.

14.3 Home / Dashboard

- **Identity card.** Your initials, name and Agent ID, with the four balance figures beneath.
- **Referral figures.** The same card shows In Progress, Done, Failed and Reschedule counts on its other side.
- **Achievement panel.** The 30 Onboard Referrals gauge, with Get Reward when a milestone is unlocked.
- **Total Balance.** Your Commission, Incentives and Bonus added together, with the Application Form control beside it.
- **Cashout History.** Your most recent payout records.

Pull the screen downwards to reload the figures.

14.4 Job Orders on Mobile

1. Select Job Order in the bottom navigation bar. The list of your active referrals opens immediately.
2. Use the search field, or select Filters, to narrow the list.
3. Select Filter by Status to show only referrals at a particular stage.
4. Select a card to open the referral.
5. Review the customer information, the address and the visit information.

6. Check the status shown on the card. A referral that has been started in the field is marked Work Started.

UPDATING A JOB ORDER FROM THE PHONE

Agents cannot update, complete or approve a job order on the phone, just as on the computer. On-site updates are recorded by the technician. If something needs to change, contact your coordinator.

14.5 Submitting an Application on Mobile

1. Open the Dashboard.
2. Select Application Form.
3. Complete the customer details, the installation address and the plan.
4. Attach the primary government identification, and any other documents. You may photograph a document directly or choose an existing image.
5. Check the mobile number and the installation address once more.
6. Select Save and wait while it reads Saving.

A confirmation message is displayed and you are returned to the Dashboard. Select Cancel at any point to close the form without submitting.

14.6 History on Mobile

1. Select History in the bottom navigation bar.
2. Select the tab you need: Commission History, Incentives History or Bonus History.
3. Set the date range, using Clear to remove it again.
4. Use the search field to narrow the records further.
5. Use the export control to produce a PDF of what is displayed.

AN ADD CONTROL MAY APPEAR HERE

Recording a payout is an Administrator task. If an add control is visible to you on this screen, it is not part of your role — do not use it. Report anything you did not expect to see to your administrator.

14.7 Profile and Menu

Shown	Meaning
Name	The name held on your account, as it appears on referrals you submit.
Account identifier	The account number or username you sign in with.
Email address	The address held on your account.
Role	Your role in the system, shown as a badge. For an Agent this reads AGENT.
About App	Information about the application, including its version.
Release Notes	What has changed in the current version.

Profile details are maintained by your administrator. If anything shown here is wrong, ask for it to be corrected — your name is used to credit your referrals.

14.8 Logging Out on Mobile

1. Select Menu.
2. Select Sign out.
3. Select Confirm to end the session, or Cancel to stay signed in.

15. Agent Button and Control Reference

Applies to: AGENT role

Every control available to an Agent account, in both applications.

15.1 Sign In and Session

Control	Function	When to Use
SECURE LOGIN	Verifies your credentials and opens the system.	To start work.
Forgot Password?	Starts a password reset.	When you cannot sign in.
Back to Login	Returns from the password reset form to the sign-in screen.	To abandon a reset.
Logout / Sign out	Ends your session.	When you have finished, and always on a shared device.
Confirm / Cancel	Confirms or abandons signing out.	In the message shown when signing out on a phone.

15.2 Dashboard

Control	Function	When to Use
Refresh	Reloads your balances, referral figures and cashout history.	After submitting an application, or when expecting a payout.
Show Referrals / Show Balances	Turns the card between the balance figures and the referral counts.	To check referral progress without leaving the screen.
Get Reward	Claims the reward for a completed onboarding milestone.	Only when the milestone is complete and the control is displayed.
Application Form	Opens the form used to submit a new customer application.	Whenever you have a new referral to record.

15.3 Application Form

Control	Function	When to Use
Save	Submits the application and credits the referral to you.	Once every required field is complete and checked.
Cancel	Closes the form without submitting.	To abandon an application. Anything typed is discarded.
Attach / choose image	Attaches a supporting document to the application.	For identification, proof of billing or a photograph of the property.
Clear image	Removes an attached document so a different one can be chosen.	When the wrong file was attached.

15.4 Lists — Job Order and Work Order

Control	Function	When to Use
Search	Narrows the list to matching records as you type.	When you know part of a name, number or address.
Filters	Opens the panel of filter fields.	To narrow the list by area, plan, status or other detail.
All Job Orders	Clears the filter selection.	To start again after filtering.
Back to Filters	Returns from the list to the filter panel on a narrow screen.	To adjust a filter on a phone.
Filter by Status	Restricts the list to one stage.	To see only referrals awaiting a further visit, for example.
Table	Shows records as rows in a table.	On a computer, or when comparing many records.
Card	Shows each record as a card.	On a phone, or when reading one record at a time.
Column Visibility	Chooses which columns appear.	To simplify the table, or to set up an export.
Export to CSV	Saves the listed records to a spreadsheet file.	To work with your referrals outside the system.
Refresh List	Reloads the records from the system.	When you expect a status to have changed.
First Page / Last Page	Jumps to the beginning or end of the list.	In a long list.
Retry	Attempts to load the list again after a connection failure.	When the list could not be loaded.
Relogin	Returns you to the sign-in screen when your session has expired.	When you are asked to sign in again.

15.5 History

Control	Function	When to Use
Commission History	Shows payouts recorded against your account.	To check what has been paid.
Incentives History	Shows quota incentives awarded to you.	To check how a quota batch was calculated.
Bonus History	Shows bonus amounts added or paid out.	To check a bonus.
Search	Narrows the records displayed.	When looking for a particular reference number.
From / To	Restricts the records to a date range.	To report on a period.
Clear	Removes the date range.	To return to the full list.
Column Visibility	Chooses which columns appear.	To set up an export.
Export to PDF	Produces a PDF of the records displayed.	To keep or share a record of your earnings.
Refresh Records	Reloads the records from the system.	When expecting a newly recorded payout.

15.6 Controls Not Available to Agents

These exist in the system but belong to the Administrator role. They are listed so you know not to look for them.

Control	Covered in
Add Work Order	Administrator procedures for work orders.
Edit or update a job order	Administrator procedures for job orders.
Approve or reject	Administrator procedures for job orders.
Assign or reassign a technician	Coordination procedures.
New Commission Payout / Add Record	Chapter 19.
New Payout, on the Agent Payout screen	Chapter 20.
Add, edit or delete an Agent team	Chapter 17.
Create or edit an Agent account	Chapter 18.

16. Agent Workflows

Applies to: AGENT role

Workflow A1 — Signing In and Reaching Your Work

1. Open the Web Application in a browser, or the Mobile Application on your phone.
2. Enter your account number, username or email address, and your password.
3. Select SECURE LOGIN.
4. The Agent Dashboard opens. Check your balance figures and your milestone progress.
5. Use the navigation menu to open Job Order, Work Order or History as needed.

Workflow A2 — Submitting a New Referral

1. Open the Dashboard and select Application Form.
2. Enter the customer's email address, first name, last name and mobile number.
3. Select the region, then the city or municipality, then the barangay.
4. Enter the full installation address, and a landmark if it will help the technician.
5. Confirm that Referred By shows your own name. It cannot be edited.
6. Select the plan the customer has agreed to.
7. Attach the primary government identification, plus any other documents you have.
8. Check the mobile number and the address once more.
9. Select Save and wait for the confirmation message.
10. Return to the Dashboard and select Refresh.

Workflow A3 — Finding a Referral

1. Select Job Order in the navigation menu.
2. Type part of the customer's name, number or address into the search field.
3. If more precision is needed, open the filters and narrow by area, plan or status.
4. Select the row or card to open the referral.
5. Review the customer information, the address, the visit information and the current status.
6. Select All Job Orders when you have finished, to clear the filters for next time.

Workflow A4 — Following a Referral to Installation

1. Open Job Order and locate the referral.
2. Check the onsite status. In Progress means the visit has not yet been completed.
3. If the status is Reschedule, contact the customer to confirm availability for the next visit, and tell your coordinator anything that would prevent it.
4. Check again after the expected visit date.
5. When the referral no longer appears in the list, open the Dashboard and select Refresh.
6. Confirm that the Done count has increased on the referral side of the card.

Workflow A5 — Claiming a Milestone Reward

1. Open the Dashboard and select Refresh so the figures are current.
2. Check the achievement gauge and confirm the milestone is complete.
3. Select Get Reward.
4. Read the confirmation message.
5. Confirm that your Commission figure has increased by the reward amount, and that Achievement records the same amount.

Workflow A6 — Checking Earnings and Producing a Statement

1. Select History in the navigation menu.
2. Select Commission History to see payouts recorded against your account.
3. Set the From and To dates for the period you want.
4. Select Incentives History to see how any quota incentive was made up, batch by batch.
5. Select Bonus History to see any bonus recorded.
6. Use Column Visibility to include only the columns you need.
7. Select Export to PDF to keep a copy.

PART THREE

The Administrator Role

The management side of the Agent Module: setting up Agent accounts and teams, and recording commission, incentive and bonus transactions. Nothing in this part is available to an Agent account. If you are an Agent, you can skip it — it is here so you know who to contact and what they will do.

17. Administrator Navigation and Team Agents

Applies to: ADMINISTRATOR role

17.1 Where the Management Screens Are

In the Web Application, the management screens for this module are grouped together under Agent in the navigation menu. In the Mobile Application they appear under Agent in the Menu.

Menu entry	Purpose	Chapter
Pay Out/In	Record and review commission, incentive and bonus transactions for any Agent.	19
Team Agents	Create and maintain the Agent teams.	17
Agent Management	Create and maintain Agent user accounts.	18
Agent Payout	Review balances and payouts one Agent at a time, and record a payout.	20
Affiliates	Maintain affiliate groups. Available in the Mobile Application.	21

17.2 Team Agents

A team is a named grouping of Agents. The Team Agents screen lists the teams belonging to your organisation, showing when each was created and by whom.

Column	What it shows
Team Name	The name of the team.
Created At	The date the team was created.
Created By	Who created it.
Actions	The controls described below.

Add

PURPOSE

Creates a new Agent team.

HOW TO USE

1. Open Team Agents.
2. Select the add control in the toolbar.
3. Enter the Team Name. It is required.
4. Save the dialog.

EXPECTED RESULT

The team is created against your organisation and appears in the list, stamped with your name and today's date.

Edit

PURPOSE

Renames an existing team.

HOW TO USE

1. Locate the team in the list, using the search field if needed.
2. Select the edit control on that row.
3. Change the Team Name.
4. Save the dialog.

EXPECTED RESULT

The team name is updated in the list. Teams belonging to another organisation cannot be edited and will be refused.

Delete

PURPOSE

Removes a team.

HOW TO USE

1. Locate the team in the list.
2. Select the delete control on that row.
3. Confirm when asked whether you are sure.

EXPECTED RESULT

The team is removed from the list. Teams belonging to another organisation cannot be deleted and will be refused.

BEFORE DELETING A TEAM

Deletion cannot be undone. Check first whether Agents are still associated with the team, and rename it instead if the grouping is simply changing.

Record Payout

PURPOSE

Opens the payout dialog directly from a team row, so a payout can be recorded without leaving the screen.

HOW TO USE

1. Locate the team in the list.
2. Select the payout control on that row.
3. Complete the dialog as described in Chapter 20.

EXPECTED RESULT

The payout is recorded and the Agent's balances are adjusted. The Agent will see it in their History.

Search and Refresh

Control	Function
Search team name	Narrows the list to teams whose name matches what you type.

Control	Function
Refresh	Reloads the list of teams.
First / Previous / Next / Last Page	Moves through a long list of teams.

18. Agent Management

Applies to: ADMINISTRATOR role

Agent Management opens the user administration screen filtered to Agent accounts. This is where an Agent's account is created before they can sign in, and where their details are maintained afterwards.

18.1 What This Screen Is For

- **Creating an Agent account.** Until an account exists with the Agent role, the person cannot sign in or be credited with referrals.
- **Maintaining details.** Names and contact details are corrected here.
- **Controlling access.** The role held by the account determines everything the person can see and do.

WHY THE NAME MATTERS

Referrals are credited to an Agent by the name held on their account, and work orders are matched to them by name or email address. If a name is recorded incorrectly, or is later changed, referrals and assignments may not be matched to that Agent. Check the spelling when creating the account, and inform the office before changing an established name.

18.2 Working With Agent Accounts

1. Open Agent Management from the Agent group in the menu.
2. Use the search field to find an existing account, or use the add control to create a new one.
3. Complete the account details, including the person's name, contact details and the Agent role.
4. Save the record.
5. Confirm the new account appears in the list.

Agent Management follows the same conventions as the rest of user administration. Where your organisation has its own procedure for issuing accounts and passwords, follow that procedure.

19. Pay Out / In

Applies to: ADMINISTRATOR role

THE SAME SCREEN AN AGENT CALLS HISTORY

Pay Out/In and the Agent's History screen are one and the same. The difference is what each role gets. An Agent sees only their own records, and no control to record anything. An Administrator sees every Agent, and the controls to record transactions.

19.1 The Three Tabs

Tab	What it lists	What can be recorded
Commission History	Commission payouts for all Agents.	A commission payout.
Incentives History	Quota incentives awarded automatically.	Nothing — this tab is a record of what the system awarded.
Bonus History	Bonus amounts added and paid out.	A bonus addition, or a bonus payout.

Incentives are calculated and awarded by the system. There is no add control on the Incentives tab.

19.2 Recording a Commission Payout

New Commission Payout / Add

PURPOSE

Records that commission has been paid to an Agent, and reduces their commission balance accordingly.

HOW TO USE

1. Open Pay Out/In and select the Commission History tab.
2. Select the add control to open the Commission Payout dialog.
3. Select the Agent being paid.
4. Optionally set a Start Date and End Date to limit which completed referrals are included.
5. Check the Total Amount. It is calculated from the Agent's qualifying referrals and their commission rate, and can be adjusted.
6. Attach the Proof of Payment. It is required.
7. Enter Remarks describing the payment. They are required.
8. Save the dialog.

EXPECTED RESULT

A commission record is created with an automatically generated Reference Number, the Agent's commission balance is reduced by the amount, and the referrals covered are marked as paid so they cannot be claimed twice. The Agent sees the record in their History.

Field	Required	Notes
Reference Number	Yes	Generated automatically and cannot be edited.
Start Date	No	Limits the referrals included to those installed on or after this date.

Field	Required	Notes
End Date	No	Limits the referrals included to those installed on or before this date.
Total Amount	Yes	Calculated for you, and adjustable.
Proof of Payment	Yes	An image of the receipt or transfer confirmation.
Remarks	Yes	A description of the payment.

19.3 Recording an Incentive Transaction

Incentives Payout

PURPOSE

Either pays out an Agent's accumulated incentives, or adds incentives to their balance manually.

HOW TO USE

1. Open Pay Out/In.
2. Open the Incentives Payout dialog from the add control.
3. Select the Agent.
4. Choose the Transaction Type: Payout to pay incentives out, or Add Incentives to credit them.
5. Check the Total Amount. For a payout it cannot exceed the incentives available.
6. Attach the Proof and enter Remarks. Both are required.
7. Save the dialog.

EXPECTED RESULT

A record is created and the Agent's Incentives figure moves accordingly — down for a payout, up for an addition. No other balance is affected.

19.4 Recording a Bonus Transaction

Bonus Payout

PURPOSE

Either grants a bonus to an Agent, or records that a bonus has been paid out.

HOW TO USE

1. Open Pay Out/In and select the Bonus History tab.
2. Select the add control to open the Bonus Payout dialog.
3. Select the Agent.
4. Choose the Transaction Type: Add Bonus to grant one, or Payout to record a payment.
5. Enter the Total Amount. For a payout it cannot exceed the bonus available.
6. Attach the Proof and enter Remarks. Both are required.
7. Save the dialog.

EXPECTED RESULT

A bonus record is created and the Agent's Bonus figure moves accordingly. No other balance is affected.

19.5 Fields Common to Every Payout Dialog

Field	Required	Notes
Agent	Yes	Who the transaction belongs to. Always confirm before saving.
Reference Number	Yes	Generated automatically and cannot be edited. Quote it if the Agent queries the payment.
Total Amount	Yes	The amount concerned.
Proof	Yes	An image evidencing the payment.
Remarks	Yes	A description of the transaction.

IF THE DIALOG REFUSES TO SAVE

The message "Agent, reference number, amount, proof, and remarks are required" means one of those is missing. The message "Failed to upload proof of payment image" means the image did not upload — nothing has been recorded, so try again with a smaller or clearer image.

20. Agent Payout

Applies to: ADMINISTRATOR role

The Agent Payout screen is organised by Agent rather than by transaction. It is the quickest way to answer "what does this Agent currently hold, and what have we paid them?"

20.1 Screen Layout

Area	What it shows
Agent list	All Agents, with All Agents at the top to remove the restriction.
Date filters	From and To fields limiting the records shown.
Summary cards	For a selected Agent: Balance, Incentives and Bonus.
Records table	The payout records for the selected Agent, or for everyone.

20.2 Reviewing One Agent

1. Open Agent Payout.
2. Select the Agent in the list on the left.
3. Read the three summary cards to see what that Agent currently holds.
4. Review the records table beneath, narrowing by date if needed.
5. Select All Agents to return to the full view.

20.3 Recording a Payout

New Payout / Add Record

PURPOSE

Records a payment to the selected Agent against whichever balance is being settled.

HOW TO USE

1. Select the Agent in the list.
2. Select New Payout.
3. Choose the Payout Type. This decides which balance is reduced.
4. Check the Total Amount. It is offered based on the balance chosen and can be adjusted.
5. Attach the Proof and enter Remarks. Both are required.
6. Save the dialog.

EXPECTED RESULT

The payout is recorded with an automatically generated reference number, and the Agent's balances are reduced as set out below.

20.4 Payout Types

Payout Type	Which balance it reduces
Commission (Balance)	The commission balance only.
Incentives	The incentives figure only.
Bonus	The bonus figure only.
All Balance	Everything owed: commission first, then incentives, then bonus.

CHOOSE THE TYPE CAREFULLY

Each balance is separate, and the Payout Type decides which one is settled. Paying incentives reduces the incentives figure and leaves the commission balance untouched, and the reverse. Recording the wrong type leaves one balance overstated and another understated, so confirm the type and the Agent before saving.

20.5 Other Controls

Control	Function
All Agents	Removes the single-Agent restriction and shows every record.
Date Filters	Opens the From and To fields.
Column Visibility	Chooses which columns appear in the records table.
Export to PDF	Produces a PDF of the records currently displayed.
First Page / Last Page	Moves through a long list of records.

21. Affiliates

Applies to: ADMINISTRATOR role

Affiliates are groups maintained alongside the Agent programme. The screen is reached from the Agent group in the Menu of the Mobile Application.

Control	Function	When to Use
Edit Affiliate	Changes the details of an existing affiliate group.	When a group is renamed or its details change.
Delete Affiliate	Removes an affiliate group.	When a group is no longer used. Check first that nothing depends on it.

22. Administrator Control Reference

Applies to: ADMINISTRATOR role

Controls available to an Administrator in the Agent Module, and not to an Agent.

Control	Screen	Function
Add	Team Agents	Creates a new Agent team.
Edit	Team Agents	Renames an existing team.
Delete	Team Agents	Removes a team, after confirmation.
Record Payout	Team Agents	Opens the payout dialog from a team row.
Add / New Commission Payout	Pay Out/In	Records a commission payout for an Agent.
Add	Pay Out/In — Bonus tab	Records a bonus addition or payout.
New Payout / Add Record	Agent Payout	Records a payout against a chosen balance.
All Agents	Agent Payout	Removes the single-Agent restriction.
Date Filters	Agent Payout, Pay Out/In	Opens the From and To fields.
Export to PDF	Agent Payout, Pay Out/In	Produces a PDF of the records displayed.
Edit Affiliate	Affiliates	Changes an affiliate group.
Delete Affiliate	Affiliates	Removes an affiliate group.

22.1 Administrator Workflows

Workflow B1 — Setting Up a New Agent

1. Open Agent Management and create the user account, giving it the Agent role.
2. Check the spelling of the name carefully — referrals are credited by name.
3. Open Team Agents and create or select the team the Agent belongs to.
4. Issue the credentials to the Agent through your organisation's normal process.
5. Ask the Agent to sign in and confirm their Dashboard opens.

Workflow B2 — Paying an Agent's Commission

1. Open Pay Out/In and select the Commission History tab.
2. Select the add control and choose the Agent.
3. Set the Start Date and End Date for the period being settled.
4. Check the Total Amount against the qualifying referrals.
5. Attach the proof of payment and enter remarks identifying the period.
6. Save, then confirm the record appears in the list with its reference number.

Workflow B3 — Settling Everything an Agent Is Owed

1. Open Agent Payout and select the Agent.
2. Read the Balance, Incentives and Bonus summary cards and note the total.

3. Select New Payout and choose the Payout Type All Balance.
4. Check the Total Amount matches what you intend to pay.
5. Attach the proof of payment and enter remarks.
6. Save, then confirm all three summary cards have reduced as expected.

Workflow B4 — Answering an Agent's Query About a Payment

1. Ask the Agent for the reference number shown in their History.
2. Open Pay Out/In, or Agent Payout with that Agent selected.
3. Search for the reference number.
4. Open the record and check the amount, the date, the remarks and the proof of payment.
5. If the record is wrong, agree the correction with your supervisor before recording anything further.

Workflow B5 — Checking How an Incentive Was Calculated

1. Open Pay Out/In and select the Incentives History tab.
2. Filter to the Agent concerned.
3. Read the Batch, Quota Reached and Incentive Value columns.
4. Confirm the number of lines matches the quota for that batch.
5. Explain to the Agent that incentives are awarded automatically once a full quota is reached, and that any remainder carries forward.

PART FOUR

Shared Reference

Guidance, troubleshooting, answers to common questions and a glossary. Entries are marked with the role they apply to wherever the answer differs.

23. Common Mistakes to Avoid

Applies to: BOTH roles

23.1 For Agents

Avoid	Why it matters
Selecting Save more than once while the form is submitting.	The control reads Saving while it works. Selecting it again may create a duplicate application. Wait for the confirmation message.
Submitting before checking the mobile number and address.	These are used to contact the customer and to find the property. An error here causes a failed or rescheduled visit, which costs you the referral.
Assuming a referral is lost when it leaves the Job Order list.	Completed referrals are removed from the list by design. Check the Done count on your Dashboard.
Selecting Get Reward repeatedly.	A milestone can only be claimed once. Repeated attempts are refused. Select it once and wait for the message.
Concluding a record is missing without clearing filters.	A search term, a filter or a date range left from earlier is the usual cause of an empty list.
Adding the Achievement figure to your Total Balance.	The milestone reward is already included in your Commission figure. Achievement is a lifetime record, not a separate amount owed.
Waiting for a job order control that does not exist.	Agents do not approve, update or assign job orders. Contact your coordinator instead.
Using an add control on the History screen.	Recording payouts is an Administrator task. Report anything unexpected to your administrator.

23.2 For Administrators

Avoid	Why it matters
Recording a payout against the wrong Agent.	The Agent selected in the dialog decides whose balance moves. Confirm the name before saving.
Choosing the wrong Payout Type.	Each balance is separate. The wrong type leaves one figure overstated and another understated.
Recording a payout twice for the same period.	The Agent's balance is reduced each time. Search for the period before recording a new payment.
Saving without a proof of payment.	Proof and remarks are required, and they are what allows a query to be answered months later.
Deleting a team that is still in use.	Deletion cannot be undone. Rename it instead if the grouping is simply changing.
Changing an established Agent name without warning.	Referrals and work assignments are matched by name. Changing it can break that matching.
Expecting to record incentives manually on the Incentives tab.	Incentives are awarded automatically when a quota is reached. That tab is a record, not an entry point.

24. Troubleshooting

Applies to: BOTH roles

Problem	Role	Possible Cause and Recommended Action
Cannot sign in.	Both	Incorrect identifier or password, or the account is not active. Check for typing errors and that caps lock is off. Use Forgot Password?. If it still fails, contact your administrator.
The menu is shorter than expected.	Both	The menu shows only what your role permits. Compare it with the table in Chapter 2.2. If an entry you need is missing, your role does not have it.
A referral does not appear on the Job Order screen.	Agent	It has been completed or failed, no job order has been raised yet, or a filter is applied. Clear the search, filters and date range, then check the Dashboard counts.
The list is empty.	Both	A search term, filter or date range is still applied. Empty the search field, select All Job Orders or All Agents, and select Clear on any date range.
Balances look wrong or out of date.	Both	The figures were loaded before the most recent change. Select Refresh on the Dashboard, or Refresh Records on the History screen.
An expected payout is not listed.	Agent	It has not yet been recorded. Select Refresh Records. If it is still absent, contact the office and quote the period concerned.
Get Reward is not displayed.	Agent	No milestone is unlocked, or the one available has already been claimed. Check the Done count against the target, select Refresh and look again.
Get Reward is refused.	Agent	The milestone has not truly been reached, or it has already been claimed. The system re-checks completed referrals on every claim. Select Refresh and read the message.
The application could not be submitted.	Agent	A required field is incomplete or a value is in the wrong format. Read the message, complete the highlighted fields, and check the mobile number is 11 digits.
The application saved but the documents did not.	Agent	The upload did not complete. The application has been submitted — contact the office so the documents can be added to the record.
A control cannot be selected.	Both	The action is not permitted for your role, or a request is still processing. Check Chapter 15.6. If a control is greyed out, wait for the current action to finish.
A payout dialog will not save.	Administrator	A required field is missing, or the proof image failed to upload. Complete the Agent, amount, proof and remarks, and retry with a smaller image if needed.
An Agent says their balance is wrong after a payout.	Administrator	The wrong Payout Type may have been used. Open the record, check which balance was settled, and agree any correction with your supervisor before recording anything further.
Referrals are not being credited to an Agent.	Administrator	The name on the account may not match the name recorded on the referrals. Check the account in Agent Management for spelling.
Information on the phone looks out of date.	Both	The screen has not been reloaded, or the connection dropped. Pull the screen downwards to reload, check the signal, then select Retry if offered.
Asked to sign in again unexpectedly.	Both	The session has expired. Select Relogin if offered and sign in again.

25. Best Practices

Applies to: BOTH roles

25.1 For Agents — Accurate Data Entry

- Enter the customer's name as it appears on their identification.
- Check the mobile number digit by digit. It is the only reliable way the technician can reach the customer.
- Give the installation address in full, and add a landmark where the property is hard to find.
- Select the region, city and barangay from the lists rather than relying on the address text alone.
- Confirm the plan with the customer before you record it.

25.2 For Agents — Reviewing and Following Up

- Read the whole form once more before selecting Save, and confirm Referred By shows your name.
- Open each attached image and confirm it is readable and the right way up.
- Check your Job Order list regularly rather than waiting to be told of a change.
- Act on a Reschedule promptly — a delayed visit is the most common reason a referral is lost.
- Keep the customer informed while they wait for the installation.

25.3 For Administrators — Recording Money Accurately

- Confirm the Agent and the Payout Type before saving. Both decide whose balance moves and which one.
- Always attach a proof of payment and write remarks that identify the period being settled.
- Search for the period first, so the same payment is not recorded twice.
- Check the summary cards after saving, to confirm the balances moved as expected.
- Quote the reference number when discussing a payment with an Agent.

25.4 For Administrators — Managing Accounts and Teams

- Check the spelling of an Agent's name when creating the account — referrals are credited by name.
- Rename a team rather than deleting it when a grouping simply changes.
- Confirm nothing depends on a team or affiliate group before deleting it.
- Review Agent accounts periodically and deactivate those no longer in use.

25.5 For Everyone — Account Security

- Never share your password. Everything done under your account is attributed to you.
- Always log out on a shared or public device.
- Report any unrecognised record to your administrator at once.
- Report any control you can see but should not be able to use.

26. Frequently Asked Questions

Applies to: BOTH roles

26.1 Questions About Roles

Who can record a payout?

Administrators only. Agents can see payouts recorded against them but cannot create one.

Why can an Agent not edit a job order?

Job orders are read-only for Agents in both applications. On-site information is recorded by the technician and administrative changes are made by an Administrator.

Can an Agent see another Agent's referrals or earnings?

No. Every list and total is restricted to the signed-in Agent, whatever is typed into a search or filter.

Why do History and Pay Out/In look different for different people?

They are the same screen. An Agent sees only their own records and no add control; an Administrator sees all Agents and can record transactions.

Who assigns the technician?

A coordinator. Neither the Agent nor the Agent Module performs assignment.

26.2 Questions From Agents

How do I submit a new customer?

Open the Dashboard and select Application Form. Complete the details, the address, the plan and the documents, then select Save.

How do I find one of my referrals?

Select Job Order, then type part of the customer's name, number or address into the search field.

Why has a referral disappeared from my Job Order list?

The list shows only referrals still in the field. Once installation is Done, or if it Failed, the referral leaves the list and is counted on your Dashboard instead.

Why does Referred By show my name and refuse to change?

Referrals you submit are always credited to your account, so the field is deliberately read-only.

What is the difference between Commission, Incentives, Bonus and Achievement?

Commission is your main spendable balance. Incentives are awarded automatically for reaching your quota. Bonus is granted by an Administrator. Achievement is a lifetime record of milestone rewards — the money itself is added to Commission.

Why is Achievement not included in my Total Balance?

Because the reward has already been added to your Commission figure. Counting it twice would overstate what you are owed.

How are incentives calculated?

Each time your completed referrals reach a full quota, one incentive is awarded automatically. Incentives History shows the batch, the quota reached and the value. Leftover referrals carry forward.

Can I claim the same milestone twice?

No. Each milestone can be claimed once. A second attempt is refused.

Do I need to submit a report?

No. There is no report for Agents to submit. Exporting your records produces a document for your own use and sends nothing to the office.

A payout is missing from my history. What should I do?

Select Refresh Records first. If it is still absent, contact the office and quote the period concerned.

26.3 Questions From Administrators

How do I set up a new Agent?

Create the user account with the Agent role in Agent Management, then create or select their team in Team Agents. Workflow B1 sets out the full sequence.

Which screen should I use to pay an Agent?

Use Pay Out/In when working through transactions by type. Use Agent Payout when working through one Agent and settling what they hold.

What does each Payout Type do?

Commission (Balance) reduces the commission balance, Incentives reduces incentives, Bonus reduces bonus, and All Balance settles commission first, then incentives, then bonus.

Can I record incentives manually?

Incentives are awarded automatically when a quota is reached, so the Incentives tab has no add control. Use the Incentives Payout dialog to pay them out or to credit an adjustment.

Why is an Agent not being credited with their referrals?

Referrals are matched by the name on the Agent's account. Check the spelling in Agent Management.

Can I delete a team that has Agents in it?

The team can be deleted, but it cannot be undone. Rename it instead if the grouping is simply changing.

An Agent says a payment is wrong. How do I check?

Ask for the reference number, search for it in Pay Out/In or Agent Payout, and open the record to check the amount, date, remarks and proof of payment.

27. Glossary

Applies to: BOTH roles

Term	Meaning
Achievement	A lifetime record of the milestone rewards an Agent has claimed. The reward money itself is added to the Commission figure.
Administrator	Office or management staff responsible for Agent accounts, teams and payouts.
Affiliate	A group maintained alongside the Agent programme.
Agent	A user who introduces new customers, follows those referrals to installation, and earns commission and incentives for them.
Agent ID	The identifier shown on the Agent Dashboard card.
Agent Module	The set of screens and functions covering Agents and their customers.
Application	The record created when an Agent submits a new customer.
Barangay	The smallest administrative area used in the installation address.
Billing Day	The day of the month on which the customer is billed.
Billing Status	The state of the customer's account for billing purposes.
Bonus	A discretionary amount granted to an Agent by an Administrator.
Cashout	A payout recorded against an Agent's account.
Commission	An Agent's main spendable balance, earned from completed referrals and credited milestone rewards.
Customer	The person receiving the service.
Incentive	An amount awarded automatically each time an Agent's completed referrals reach a full quota.
Installation Fee	The fee recorded against a job order for carrying out the installation.
Job Order	The installation record raised for a customer, tracking the visit through to completion.
Milestone	A target number of onboarded referrals which, once reached, unlocks a reward the Agent can claim.
Mobile Application	The SYNC System used on a phone.
Onboarded	A referral whose installation has been completed successfully.
Onsite Status	The state of the installation visit: In Progress, Reschedule, Done or Failed.
Payout Type	On a payout dialog, the setting that decides which balance is reduced.
Plan	The service package the customer has agreed to.
Proof of Payment	The image attached to a payout record evidencing the payment.
Quota	The number of completed referrals required to earn one incentive.
Referral	A customer introduced by an Agent.
Referred By	The field recording which Agent a customer was referred by.
Reference Number	The identifier generated for a payout record. Quote it when querying a payment.
Reschedule	A status meaning a further visit is required.
Role	What an account is permitted to do — in this manual, Agent or Administrator.

Term	Meaning
SYNC System	The complete system, of which the Agent Module is one part.
Team	A named grouping of Agents, maintained on the Team Agents screen.
Technician	The person who visits the customer's address and carries out the installation.
Total Balance	An Agent's Commission, Incentives and Bonus figures added together.
Web Application	The SYNC System used on a computer, in a web browser.
Work Order	A unit of work recorded in the system and assigned to a named person.
