How to read this guide

Admin screens are shown in the system's default **dark theme**; agent-facing screens are shown in their own **light theme**. Things you tap or click are named in **violet**. Button colours follow your organisation's configured colour palette, so yours may differ from the figures.

Web and mobile are the same system

Sections 1–10 cover the browser. Sections 11–14 cover the **mobile app**, which reads the same data — a payout you record on the web appears on the agent's phone as soon as they refresh.

1 What the Agent Module Does

Agents refer customers to the company. When a referred job order is completed, the agent earns money. The Agent module is where you **organise agents into teams**, **track what each agent has earned**, and **record the payments you make to them**.

The four admin screens

Screen	What you use it for
Pay Out/In	Browse the full history of commission, incentive and bonus movements across all agents
Team Agents	Create, rename and delete agent teams , and record a commission payout for a team
Agent Management	Manage the individual agent user accounts that people sign in with
Agent Payout	See each agent's live balances side by side and pay them out

Who can see what

Role	Access
Administrator	Full access to all four screens, including recording payouts
Superadmin	Full access to all four screens, including recording payouts
Agent	Only their own Dashboard and History — read-only, and limited to their own records. See section 10.
All other roles	The Agent menu is hidden entirely

Teams and agent accounts are two different things

A **team** (managed in Team Agents) is just a named group with its own balance. An **agent account** (managed in Agent Management) is a person's login. Do not expect renaming a team to change anyone's user account, or vice versa.

The one rule worth remembering

Money moves in only two directions: it is **earned** automatically when referred job orders complete, and it is **paid out** manually by you. Every payout you record needs a **proof-of-payment image** and **remarks** — the system will not save one without both.

2 Finding the Agent Menu

- 1 Log in with an **administrator** or **superadmin** account.
- 2 In the **left sidebar**, find the **Agent** group.
- 3 Click it to expand. Four items appear (Figure 1).
- 4 Click whichever screen you need.

The group stays expanded while you work, so you can move between the four screens without re-opening it each time.

Signed in as an agent?

You will not see this group at all. Instead you get **Dashboard** and **History** as top-level items.

Figure 1. The Agent group expanded in the sidebar.

Which screen should I open?

If you want to...	Go to
Create or rename an agent team	Team Agents
Add a new agent login, or edit one	Agent Management
Check how much a specific agent is owed	Agent Payout
Pay an agent their commission, incentives or bonus	Agent Payout
Review every payment ever made, across all agents	Pay Out/In
See which incentives were awarded automatically	Pay Out/In → Incentives History

3 Team Agents

This screen lists the agent **teams** in your organisation. You only ever see teams belonging to your own organisation — teams from other organisations are filtered out automatically.

Team Agent Management

Manage system agents and teams

Q Search team name...

Team Name	Created At	Created By	Actions
Alpha Sales Team	3/14/2026	admin@sync.ph	
Bravo Field Team	4/02/2026	admin@sync.ph	
Charlie Referrals	5/20/2026	ops@sync.ph

>>

Figure 2. The Team Agents screen. The three action icons are, left to right, **Record Payout** (green), **Edit** (blue) and **Delete** (red).

Search matches the team name only

Unlike other screens, the search box here does **not** look at the created-by address or the date. If you cannot find a team, clear the search first.

Creating a team

- 1 Click the violet **+** button at the top right.
- 2 The **Add New Agent** dialog opens (Figure 3).
- 3 Type the **Team Name**.
- 4 Click **Save**.

A dark-themed dialog box titled "Add New Agent" with a close button (X) in the top right corner. Below the title is a label "Team Name" followed by a text input field containing the placeholder text "Enter team name". At the bottom right of the dialog are two buttons: "Cancel" and "Save".

Figure 3. The Add / Edit Agent dialog — one field.

Renaming a team

- 1 Click the blue **Edit** icon on the team's row.
- 2 The same dialog opens, titled **Edit Agent**, with the current name filled in.
- 3 Change the name and click **Update**.

Team Name is the only field, and it is required

Leaving it blank shows **Required** under the box and blocks the save. Everything else — who created the team and when — is filled in for you from your signed-in account.

Deleting a team

- 1 Click the red **Delete** icon on the team's row.
- 2 A browser confirmation asks "Are you sure you want to delete this agent?"
- 3 Click **OK** to delete, or **Cancel** to keep it.

Deleting cannot be undone

There is no restore or archive. Delete a team only when you are certain it is no longer needed.

Recording a payout from this screen

- 1 Click the green **Record Payout** icon on the team's row.
- 2 The **Commission Payout** dialog opens with that team already selected — see section 8 for the full walkthrough.
- 3 On success a message confirms "Commission payout recorded successfully!"

4 Agent Management

This screen manages the **user accounts** that agents sign in with. It is the same screen as User Management, but filtered so that **only agent accounts** are listed — you cannot accidentally edit a technician or a customer here.

The screenshot shows the 'Agent Management' interface. At the top, there's a header with the title 'Agent Management' and a subtitle 'Manage agent users'. To the right of the header are two icons: a refresh icon and a plus icon. Below the header is a search bar with the placeholder text 'Q Search name, username or email...'. The main content is a table with five columns: Name, Username, Email, Role, and Status. The table contains three rows of agent data. The first two rows show 'ACTIVE' status, and the third row shows 'INACTIVE' status.

Name	Username	Email	Role	Status
Maria D. Santos	msantos	m.santos@sync.ph	Agent	ACTIVE
Jose R. Cruz	jcruz	j.cruz@sync.ph	Agent	ACTIVE
Ana L. Reyes	areyes	a.reyes@sync.ph	Agent	INACTIVE

Figure 4. Agent Management — the same list as User Management, pre-filtered to agent accounts only.

What is different from User Management

Behaviour	Explanation
Only agents listed	Accounts with any other role are hidden, whatever you search for
No Operations / Customer filter	That filter is removed here — it would have nothing to do
Different heading	Reads Agent Management · Manage agent users

Searching

The search box matches **full name**, **username** and **email address**. Partial words work, so typing **san** finds *Maria D. Santos*.

An agent needs an account here to sign in

Creating a team in Team Agents does not create a login. If an agent cannot sign in, check that they have an account on this screen and that its role is **Agent**.

5 Pay Out/In

This is the **full ledger**. It shows every commission, incentive and bonus movement recorded in the system, split across three history views you switch between in the left panel.

Figure 5. Pay Out/In showing Commission History. The left panel holds the Add button, the date filter and the three views.

The three views

View	What it lists
Commission History	Commission payouts you recorded, each tied to the job orders it covers. Opens by default.
Incentives History	Automatically awarded quota incentives — generated by the system, not by you
Bonus History	Bonus movements, both additions and payouts

Columns in each view

Commission History	Incentives History	Bonus History
ID Ref Number Total Amount Job Orders Processed By	ID Agent Job Order Batch Quota Reached Incentive Value Processed At	ID Ref Number Type Total Amount Processed By

Incentives History has no Add button

That view is a record of what the system awarded automatically when agents hit their quotas. There is nothing to add by hand, so the button is hidden. To pay incentives *out*, use Agent Payout (section 7).

Working with the table

Action	How
Sort	Click a column heading; click again to reverse. An arrow marks the sorted column.
Reorder columns	Drag a heading sideways and drop it. Your order is remembered for next time.
Resize a column	Drag the thin handle on the right edge of a heading.
Show / hide columns	Click the columns icon, then tick or untick. Select All and Deselect All are at the top.
Filter by date	Set From and To in the left panel. Clear appears once either is set.
Search	Matches across every field in the row , ignoring spaces.
Export	Click the download icon to export the current view to PDF , using your visible columns in their current order.
See full detail	Click any row. A detail panel opens with arrows to step to the previous or next record.
Page size	10, 25, 50, 100 or 200 rows. 50 by default.

Export gives you exactly what you see

Hide the columns you do not need and drag the rest into the order you want *before* exporting — the PDF follows your on-screen layout.

6 Agent Payout

Where Pay Out/In is organised by *transaction*, this screen is organised by **agent**. Pick a person on the left and their live balances appear above their payout history.

Figure 6. Agent Payout with one agent selected — the three balance cards appear only once you pick a specific person.

Choosing an agent

- 1 The left panel opens on **All Agents**, with a badge showing how many agents exist.
- 2 Click a name to narrow the table to that person.
- 3 The three **balance cards** appear above the table. They are shown only for a single agent — on **All Agents** there is nothing meaningful to total, so they stay hidden.
- 4 Click **All Agents** again to go back to everyone.

The three balance cards

Card	What it holds
Balance	Commission earned from completed referred job orders and not yet paid out
Incentives	Quota incentives awarded automatically and not yet paid out
Bonus	Bonus amounts credited and not yet paid out

Reading the table

Column	Meaning
ID	Internal record number
Type	A coloured badge — Payout (red) means money went out; Add Incentives (green) means money came in
Ref Number	The 10-character reference generated when the payout was recorded
Total Amount	Shown -red for a payout and +green for an addition
Job Orders	The job orders the payment covers, listed as #4021, #4033
Processed By	The staff account that recorded it

The sign tells you the direction at a glance

Anything with a red minus reduced the agent's balance; anything with a green plus increased it. You never have to open a record just to find out which way the money went.

Sorting, column reordering, resizing, visibility, search, date filtering, PDF export and paging all behave exactly as described in section 5. The left panel can also be **dragged wider or narrower** using its right edge.

7 Recording an Agent Payout

Use this when you pay an agent from their **existing balances**. Click + **Add** on the Agent Payout screen, or the green **Record Payout** icon on a row.

Figure 7. The Agent Payout dialog. On screen the fields are stacked in one scrolling column; shown side by side here to fit the page.

The three small cards are your ceiling

They show what the agent currently has in each pot. The amount you enter cannot exceed the balance for the payout type you picked.

7 Recording an Agent Payout · continued

- 1 **Select the Agent.** Type to search. If you opened the dialog from a specific row, this is already filled in and the field is not shown.
- 2 **Check the three balance cards** that appear once an agent is chosen.
- 3 **Choose the Payout Type.** The **Total Amount** is filled in automatically with that pot's full balance — change it if you are paying only part.
- 4 **Leave the Reference Number alone.** It is generated for you and is read-only.
- 5 **Enter the Total Amount,** if different from the auto-filled figure.
- 6 **Upload the Proof.** Click the dashed box and pick a PNG, JPG or JPEG. A green **Uploaded** tag confirms it; the X removes it.
- 7 **Write the Remarks.** Free text, but required.
- 8 **Click Save.**

The four payout types

Type	Pays from
Commission (Balance)	The commission balance only
Incentives	The incentives balance only
Bonus	The bonus balance only
All Balance	Commission + incentives + bonus combined

Why Save might stay greyed out

Rule	What to do
No agent selected	Pick an agent from the search field
Amount is empty or zero	Enter an amount greater than zero
Amount exceeds the balance	Lower it, or switch to All Balance if you meant to pay from every pot
No proof image	Upload a photo or screenshot of the payment
Remarks empty	Type at least a short note

All five conditions must be met

The Save button stays disabled until every one is satisfied. If it looks stuck, work down the list above — a missing proof image is the most common cause.

After saving

The agent's balance drops by the amount paid, the new record appears at the top of the history with a red **Payout** badge, and the proof image is filed to Google Drive automatically.

8 Recording a Commission Payout

This is the other kind of payout. Instead of drawing on a balance, it settles **a specific set of completed job orders** the agent referred. Open it from **+ Add** on Pay Out/In, or the green **Record Payout** icon in Team Agents.

Record Payout — Alpha Sales Team

Cancel Save

Figure 8. The Commission Payout dialog. The badge shows how many job orders were found and the rate paid for each.

- 1 **Select the Agent** (already filled in if you came from a team row).
- 2 **Set the Start Date and End Date.** The system looks up that agent's **completed** job orders in this window.
- 3 **Check the job orders found.** Each customer appears as a small tag, with the count and per-job rate in the badge above.
- 4 **Confirm the Total Amount**, calculated from those job orders.
- 5 **Upload the Proof** and **write the Remarks.**
- 6 **Click Save.**

"No completed job orders found for this agent"

Save stays disabled when the list is empty. Widen the date range, and confirm the agent's referrals have actually been completed — pending job orders are not counted.

9 Understanding the Four Balances

An agent's money sits in up to four separate pots. Knowing which pot a payment came from is the key to reading every screen in this module.

Balance	How it is earned	How it is paid out
Commission	Automatically, when a job order the agent referred is completed . Each job order pays a fixed rate.	Commission Payout (section 8) or Agent Payout using type Commission (Balance)
Incentives	Automatically, when the agent reaches a quota . Recorded in Incentives History with the batch and quota that triggered it.	Agent Payout using type Incentives
Bonus	Credited as a bonus. Both additions and payouts appear in Bonus History.	Agent Payout using type Bonus
Achievement	Claimed by the agent in their own portal after hitting a referral milestone (section 10).	Included when you pay with type All Balance

Two pots fill themselves

Commission and **Incentives** are credited by the system — you never add them by hand. Your job is to pay them out and keep the proof. This is why Incentives History has no Add button.

Where to look up each balance

Question	Where to look
What does this agent hold right now?	Agent Payout → select the agent → the three balance cards
Why did they earn this incentive?	Pay Out/In → Incentives History → Batch and Quota Reached
Which job orders did this payment cover?	Pay Out/In → Commission History → Job Orders column
Who processed a payment, and when?	Any history view → Processed By, or click the row for full detail

Paying everything at once

Choose **All Balance** in the Agent Payout dialog. The amount is pre-filled with commission + incentives + bonus added together, so you settle the agent in one record instead of three.

10 The Agent Portal

Agents sign in to the same system but see a much smaller, **read-only** version scoped to their own records. It is worth knowing what they see, because most agent questions are about this screen.

Figure 9. The Agent Dashboard. Note this screen uses a **light theme**, unlike the admin screens.

Section	What the agent sees
Total Balance	All four pots added together, with each shown separately beneath
Achievement	Progress towards 30 onboarded referrals . Every 30 unlocks a ₱1,500 reward they claim themselves.
Referral funnel	Their own job orders counted as In Progress, Done, Failed and Reschedule
Cashout History	Their five most recent payouts
History (sidebar)	Their full commission, incentive and bonus history — read-only, with no Add button

11 Getting Around the Mobile App

Agents mostly work from their phone. The mobile app signs in against the **same system** and shows the same balances — anything you record on the web appears here once the agent pulls to refresh.

What an agent sees

Tab	Opens
Dashboard	Balances, achievement gauge and recent cashouts (section 12)
Job Order	The job orders they referred
Work Order	Work orders they have access to
History	Commission, incentive and bonus history (section 13)
Menu	Everything else, plus sign out

Same login, different shape

There is no separate agent app. The app decides what to show from the account's role, so an agent signing in lands straight on the Agent Dashboard.

Figure 10. The mobile app with the agent's five tabs.

Refreshing

Every agent screen supports **pull-to-refresh** — drag down from the top of the list and release. The Dashboard also refreshes its balances, referrals and cashouts in one go.

12 The Mobile Agent Dashboard

This is the first screen an agent sees. It is built around a **gradient card that flips** between money and referrals, an achievement gauge, and a short cashout list.

Figure 11. Front — money.

Figure 12. Back — referrals.

Tapping the  icon on the card flips between the two faces. The email address appears only on the back.

The flip card

Face	Shows
Front (money)	Incentives, Commission, Bonus and Achievement as four figures
Back (referrals)	In Progress, Done, Failed and Reschedule counts, plus the agent's email

The same four pots as the web

These are the balances from section 9. The card is just a phone-sized view of them — nothing here is a separate figure.

The achievement gauge

Below the card sits a large speedometer-style gauge counting toward **30 onboarded referrals**. The number in the middle is how many of the current 30 are done.

- 1 The gauge fills as referred job orders are marked **done**.
- 2 On reaching 30, a **Get Reward (₱1,500)** button appears.
- 3 The agent taps it. A confirmation reports the reward was added to their **achievement rewards**.
- 4 The gauge resets and starts counting the next 30.

Total Balance and Application Form

A second gradient card shows the **Total Balance** — all four pots added together — with an **Application Form** button beside it that opens a new customer application, so agents can refer someone on the spot.

Cashout History

The last section lists the agent's **five most recent** cashouts, each with its reference number, date, amount and a green **POSTED** marker. If there are none it reads "No cashouts found".

The reward is not automatic

Nothing is credited until the agent taps **Get Reward** themselves. If an agent says a milestone reward never arrived, this is almost always why.

Figure 13. Gauge, total balance and cashouts.

13 Mobile History and Incentive Batches

The **History** tab gives agents the same three views as the web — **Commission**, **Incentives** and **Bonus** — as tabs across the top instead of a side panel, with export to PDF.

The app also contains a richer, **job-order-level** history screen built for phones. It groups automatic incentives into expandable **batches** and shows, referral by referral, whether the commission has been collected (Figure 14).

Figure 14. The job-order history screen. Left: referrals with their collection status. Right: **Incentives** mode, with batch #2 expanded and batch #1 collapsed.

The three filter chips

Chip	Options	Effect
Type	All Types · Incentives	Switches between the referral list and the incentive-batch list
Status	All Status · Not Collected · Collected	Filters by whether commission has been paid. Hidden in Incentives mode.
Date	From · To · Clear	Limits to a date range. Future dates cannot be picked.

Reading a referral card

Element	Meaning
Customer name	Who the agent referred
Work Started	A green tag shown when the job has begun but not finished
Date and address	When it was logged and where the installation is
Fee	The installation fee for that job order
Installation Status	The on-site status — Done, In Progress, Failed, Reschedule
Commission	Collected (green) once paid, Not Collected (red) until then

Only completed referrals are listed

The screen shows job orders whose on-site status is **done**. A referral still in progress will not appear here, even though it is counted on the Dashboard's referral face.

Incentive batches

- 1 Switch the Type chip to **Incentives**.
- 2 Each batch shows its **number**, when it was **processed**, a **progress badge** and the **value** awarded.
- 3 The badge is **green** when the quota was met in full and **amber** when the batch is partial.
- 4 Tap a batch to expand it and see the numbered customers that made it up. Batches start **collapsed**.

Both lists page **5 records at a time**, with Prev / Next controls and a page indicator at the bottom.

This is the screen to open when an agent disputes a payment

It answers "which of my referrals have I actually been paid for?" — customer by customer, with the collection status on each. The web equivalent only shows the totalled payout record.

Not currently linked in the mobile navigation

At the time of writing this screen is built and working, but no tab or menu item opens it — the **History** tab goes to the standard Commission / Incentives / Bonus view instead. Treat this section as a description of a screen awaiting a navigation entry, not a route agents can reach today.

14 Admin Screens on Mobile

Administrators are not limited to the browser. The mobile app carries the same four admin screens, redrawn for a narrow display, so you can pay an agent from your phone.

Screen	How it differs from the web
Agent Payout	The agent list becomes a dropdown picker rather than a side panel. It still starts on All Agents with a count, and the same three balance cards appear once you pick somebody.
Pay Out/In	The three views become tabs across the top instead of a side panel. Same records, same export.
Team Agents	Teams become stacked cards rather than a wide table, with the same record-payout, edit and delete actions.
Agent Management	The same agent-only account list, as cards.

Figure 15. Agent Payout on mobile — agent picker, the three balance cards, then payout records as cards.

The rules do not change

Payout type, the auto-generated reference, the balance ceiling, and the required **proof image** and **remarks** all work exactly as described in section 7. Only the layout differs.

15 Troubleshooting

Problem	What to do
Agent menu missing from sidebar	The group is hidden for every role except administrator and superadmin. Check the account's role, then sign out and back in.
Save button greyed out on a payout	Agent, amount, proof image and remarks are all required, and the amount must not exceed the balance. A missing proof image is the usual cause.
"Payout amount cannot exceed available balance"	You entered more than that pot holds. Lower the amount, or choose All Balance to draw on every pot.
"No completed job orders found"	Widen the Start/End dates and confirm the agent's referrals are marked completed. Pending job orders are never included.
A team is missing from Team Agents	The list is filtered to your own organisation, and the search matches the team name only . Clear the search first.
An agent is missing from Agent Management	Only accounts with the Agent role appear. If their role is set to something else, they will never show here.
Agent cannot sign in	A team in Team Agents is not a login. Confirm they have a user account in Agent Management with the Agent role.
Balance cards not showing	They appear only when a single agent is selected in the left panel, not on All Agents .
No Add button on Incentives History	Correct and intended — incentives are awarded automatically. Pay them out from Agent Payout instead.
Balances look out of date	Click the refresh icon in the toolbar. It re-checks for updates without reloading the page.
Export is missing columns	The PDF follows your on-screen layout. Re-enable the columns in the column-visibility menu, then export again.
Column widths or order reset	Your column order is stored in the browser. Using a different browser, device or profile starts from the default.
Agent says their reward never arrived	Achievement rewards must be claimed by the agent in their own dashboard or mobile app. Until they tap Get Reward , nothing is credited.

Mobile app

Problem	What to do
Balances look wrong on the phone	Pull down to refresh. The app caches the last values it fetched; a payout you recorded on the web appears only after a refresh.
Agent lands on the wrong screen	The app picks the home screen from the account's role. If they do not land on the Agent Dashboard, their role is not Agent .
A referral is missing from mobile History	That screen lists only referrals whose installation is done . In-progress referrals show on the Dashboard's referral face instead.
Incentive batch shows an amber badge	Normal — the quota was only partly filled. Green means it was met in full.

The five-step short version — paying an agent

1. Sidebar → Agent → **Agent Payout** → 2. Click the agent, read their balances → 3. **+ Add** → 4. Pick the payout type, confirm the amount, upload proof, write remarks → 5. **Save**.
